

Dear Participants

You will need to present a working model of your solution. It should provide the data, codes and presentation slides. The results must be shown to be reproducible. This presentation serves as a guide for your presentation submission. Please remember that you will also be judged based on the quality of the power point.

Here are a few guidelines for you to follow:

- Your presentation should **not** exceed 10 mins.
- Present your stock timing model and show the optimal time points to complete the trade.
- Explanation of how you derive your model.
- Demonstrate the accuracy of your model.
- Demonstrate the cloud services you are using in this competition and its function.
- Include only essential points.
- Use graphics effectively.
- Make sure all the information is viewable during presentation mode.
- Give credit, where credit is due. References and links should also be placed in the last slide.
